

Chapter 67 Inc.  
205 E. 161st Street  
Westfield, IN 46074

OCTOBER 1987

October's meeting was held at the Allison Turbine School. We had a very good turnout of members, including some we haven't seen for awhile. President Tom Watkins kept the business meeting short to provide more time for the special program.

A few items that were covered in the short business meeting included the following:

**Donations:** Our chapter has received a simulator which has now been moved into the hangar. It is not currently working just right, but is a terrific potential if we can get some people to tinker on it. (Sounds like a great Saturday project!) Foster Aviation at Brookside airport is the source of this kind contribution, along with help moving it to our hangar by the Mount Vernon Aviation Club. Also donated to our chapter are some jacks and weights, by Roy Vance. With all the work being done by members on airplanes lately, these could be a real benefit. Thanks, Roy.

**Lathe:** We now have a motor for the lathe. Manuals have been ordered.

**Christmas dinner:** A short discussion took place concerning our 1987 Christmas dinner. Nothing firm has been decided yet on where we will go, but possibilities are being accumulated so that we can decide in November's meeting. If you have any super ideas, bring them along.

**Special Dinner Meeting With EAA National Guest:** President Dave Clark of EAA chapter 689 has invited us to join his chapter for a special dinner meeting on November 4, 1987 (a Wednesday) that they have organized with special guest speaker Tom Poberezny from EAA National coming to give a talk. It is set up to be at Arthur's at the Midway Motor Lodge. All are welcome.

**Election of board members:** We have a couple of slots on the **Board** of Directors for our chapter. Elections during November's meeting.

#### Program

Our program this month was an excellent presentation by Bob Cook of the Allison Turbine School. Arranged by Walt Fritz, we met at the school, located near Indianapolis International Airport, and informally toured some of the facilities prior to the meeting. Then Mr. Cook gave us a very fine talk about the turbine engine, including how it works, problems that it has encountered, and information on the school itself. It was a very enjoyable program. Many thanks to Mr. Cook, and to Walt Fritz for setting it up.

**Next Meeting-** Our next meeting will be Monday, November 2, 1987 at the regular meeting place at Wilderness Field. See you there!

Respectfully submitted,

*Peter J. Murphy*  
Secretary
